### Durable Rating Classes

Class 1: The highest natural durability, which can resist both decay and termite, attack for at least 25 years and up to 50 years in the ground.

Class 2: Timbers of high natural durability, which may be expected to have a life of about 15 to 25 years in the ground.

Class3: Timbers of moderate durability, which may be expected to have a life of about 8-15 years in the ground.

Class 4: Timbers of low durability, which may be expected to have a life of about 1-8 years in the ground.
