

Victoria's most advanced LOSP timber treatment plant

DAVIDS TIMBER has installed the most advanced LOSP timber treatment plant in Victoria as it becomes the State's largest outdoor timber treatment company.

Davids Timber decided to install a new large capacity and highly efficient LOSP plant to meet growing customer demand to supply a wide variety of timber products including solid timber, plywood, LVL, finger jointed and laminated products and to also provide custom treatment services.

The addition of this state-of-the-art LOSP treatment plant significantly adds to the treatment capacity of Davids Timber which includes ACQ and CCA treated products. The company recently became the first plant to offer the latest generation MicroPro treatment technology in Australia.

■ Maurice and David Efron.

preservative offers protection against termites and fungal decay for outdoor timbers and does not affect the moisture content of the treated timber products and therefore, does not require redrying after treatment.

LOSP capability means that Davids Timber now has the largest timber treatment operations in Victoria all located under one roof in Dandenong South, Victoria.

In addition to treating with LOSP H3, the plant will also be producing H2F Blue product, suitable for termite protection for framing.

Davids Timber is pleased to continue its alliance with Osmose, the world's leading timber preservative supplier.

Davids Timber was founded by David and Maurice Efron in 1989 and has grown into a company with world-class standing in the timber treatment industry.

"The new LOSP facility continues a tradition of

innovation and investment at Davids Timber. We are committed to providing the latest technology for the preservative treatment of timber to improve the durability of all outdoor timber," David said.

"Davids Timber is Victoria's leading outdoor timber wholesaler and timber custom treatment supplier. We are very excited about this new highly efficient and fully automated LOSP plant. We will continue to focus on a high level of customer service for both timber supply and custom treatment," said Maurice.

Davids Timber is a major supplier of treated treated pine, cypress, durable hardwood for use

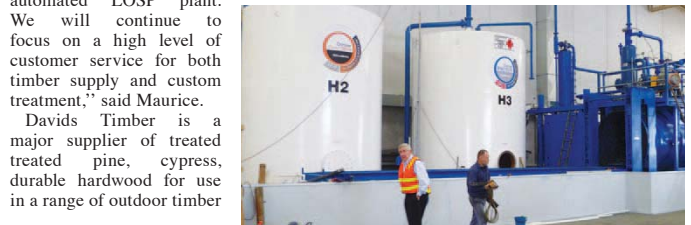

- applications including:
- All outdoor building structures
 - Boardwalks
 - Decks and pergolas
 - Domestic and commercial fencing
 - Landscaping
 - Marine and coastal applications
 - Parks and gardens

Many of the timber products produced by Davids Timber are supplied by the company's sawmill

located in Broadford in Victoria as well as leading sawmills located throughout Australia and New Zealand.

In addition to the supply of timber, Davids Timber also offers custom treatment in CCA, ACQ, MicroPro and now H2F and LOSP H3.
